

# Angelus Britannicus:

A NEW

## EPHEMERIS

For the Year of our Redemption, 1695.  
Being the third after the *Bissextile* or *Leap-Year*.

Since	[ The Creation of the World, 5644 ]	
	The Death of our Saviour, 1662	
	The Conquest of this Nation, 629	
	The Restauration of K. Ch. II. 35	
	The Last great Plague, 30	
	The Burning of London, 29	
	The Last great Frost 11	
	The Death of K. Charles II. 10	
	[ The Abdication of K. James II. 6 ]	

Yea.

Amplified with Observations

From the Sun's Ingress into the Equinoctial Sign *Aries*, and the other Cardinal Points; with an account of the Eclipses, Conjunctions of the Planets, and other Configurations of the Coelestial Bodies.

Calculated for the Meridian of the famous City of *London*, where the Pole Arctick is Elevated above the Horizon 51 Degr. 32 Min. but may indifferently serve for *ENGLAND*, *SCOTLAND* and *IRELAND*.

By John Tanner Student in Physick and Astrology,  
The Thirty Ninth Impression.

Agunt, non Cogunt.

London, Printed by W. Horton for the Company  
of Stationers, 1695.

A Table of the exact time of the moon's coming to the South for every day of the first six months of the Year 1695. serving to find out more exactly the time of high water in most of the eminent Ports in England, Scotland, and other Ports adjacent.

January hath xxxi. days.

Could I invoke thy names to my aid,  
My Geniuses to awake, and guide my quill!  
Ye Sisters thrice three, yet it now be said,  
That to your Lovers you repay good with,  
Gentle Minerva, do not now disdain,  
The abstruse Heavenly Secrets to explain.

[illegible]

# January 1695. 23

Month  
Days.

The Sun and Mars conjoin'd, both bath the name  
Of fiery Planets, who would not expect,  
From their united fiery force a Flame  
In th' Heaven's on Earth such like Effect?  
But Mars blows Hot and Cold, now Freeze, then Shower,  
Now fog, then mist, and the Air clear next Hour.

# February hath xxviii days.

Be quiet Mars, thou'rt not in the Campagne,  
In Winter quarters, Mars will be Mars still,  
The Winter Season can't his Courage tame,  
Nor shall his valour yet out-do his Skill.  
War is a Trade affords abundant gain,  
We know full well, who 'ris endures the pain.

## February 1695.

The God of War gave Jupiter, both threat  
 With beams opposing, and disturbs the Air:  
 And variously the rest each other Treat,  
 Sometimes rough weather, sometimes clear and fair.  
 As they aspect in Heaven, they'll let us know,  
 Their answerable influence below.

2755 APRIL 1685. V&amp;M

To th' highest the inferiours join their powers,  
 The Earth's Cold Barren Womb to fructifie,  
 And sends us sometimes store of April Showers,  
 And sometimes blustering gales that clear the Skies,  
 And sometimes Heat, that raiseth Clouds and Thunder,  
 And that brings Rain, tending the Clouds in Sunder.

23

At the beginning view the troubled Sky  
With hollow broken Clouds that threaten Thunder:  
Sometimes it rains, sometimes the winds are high,  
A cooler Air soon : And 'tis no wonder  
If Saturn dark the Air near the end,  
Unkind and blasting Storms perhaps he'll send.

New Moon 36 m. past 5 at night. flying clouds.

Cease sullen Murmurers, for God is just,  
 Provoke not Heaven, nor Providence contemn;  
 Let Priences too beware in whom they trust,  
 Foes reconcil'd oft prove the worst of Men.  
 Let Tyrants hang their heads as Men afraid,  
 Whilst Princes just, their Majesties display'd.

July 1695.

23

Month Days.

Whilst the two Fortunes lovingly direct  
Their amicable Beams, with fertile Showers  
Sometimes pleasant serenity's the effect  
Of their Benevolent, and Amicable Powers.  
Hence we expect, and not without good reason,  
Such Weather that will mostly fit the Season.

Phases and other Observations of the Moon & Weather

1	New Moon	40 m. past 8 morning.	☾ Apogee.
2	1 The Battle at the Boyne.	1690	☾ some clouds threaten rain and thunder.
3	2 The Battle at Marston Moor.	1644	
4	Dublin in the Protest. hands.	90	
5	1 Day 16 hours 10 minutes.		
6	Francis Lord Villers slain.	1648.	
7	8 Don Pantaloon Sa. of Portugal, and		☾ for the most part
8	Col. Gerhard beh. on Tower Hill.	54	☾ seasonable.
9	☾ 1st Quarter	40 m. past 8 morn.	☾ some moisture.
10			
11			
12	12 G. Monk made D. of Albem.	60	☾ ☿ ☽ cool
13	The Rout at the Devizes.	1643	☾ clouds threat. rain.
14			
15	16 Lichfield close surrendred.	1646	☾ ☿ Perigee.
16	☾ 1st Moon	34 m. past midnight.	☾ hot threat. showers.
17	18 Dr. Levens executed.	1650	☾ ☿ ☽ soon clear.
18	O. Cromwell's Army at Berwick.	50	☾ ing, hot, fair but
19	19 A bl. Battel in Flanders.	1693	☾ windy.

August 1695. 23

Month Days. Heaven's motions this month much disturb the Air,  
Of changing weather, and oft turbulent;  
Hinders the Farmer; the malignant pair  
(With fury) do display their male intent,  
With thunder-storms, with rain and boisterous wind;  
Take Time by th'foretop, for he's bald behind.

October 1695.

23

Month Days.

Sol at th'beginning with the Virgin's Spike,  
Doth oftentimes send sudden showers of Rain,  
Sometime serene and fair, and that we like,  
Dark Clouds arise, and clearing soon again.  
Saturn spreads Clouds, th' Inferiors joyn their Powers,  
To melt them into brisk and sudden Showers.

November 1695. 23

Month Days.

Venus slides backward on the Scorpion's Tail,  
Squares Mars, and afterwards doth joyn the Sun :  
To bring much moisture she doth never fail.  
Her Rosy Cheeks with Tears are over-run.  
Mars quarrell to the Sun doth warm the Air,  
Yet sometimes freeze, then rain, soon after fair.

December hath xxx. days.

Who would adventure then to trust a Foe,  
 Although he seemeth to be reconcil'd?  
 Nay, worse to wink at those pretend not so,  
 And in's affairs not to be beguil'd.  
 If you'd be safe, let good men be your guide,  
 And keep the Nation's Laws still on your side.

Month Days. Some clearing gales this black month do begin,  
Soon after thick clouds threaten Snow or Rain.  
Sometimes it freezeeth, and the Air more thin,  
Till Sol and Saturn clouds the Air again,  
And bides the New Moon's lustre from our sight,  
And Christmas dulls by th'darkness of the night.

William 3	1650									
Mary 2	1662	1689	Feb.	13	Whom God grant long to Reign.					

Bafe Matchmaking Slaves from Court be gon,  
Avant Dispensing Councils from the Throne.

Iust Execution of our wholsom Law,

Makes the good love, and bad Men stand In Awe ;

No need of Russian Guards, nor Priest-craft Aris,

When th' Prince is lodged in the Peoples Hearts.

'Tis this all good men wish for : for this I'll pray,

Till I despair, or see the happy day.

Rye, Winchelsea, Guree, Thames, Rhodes.	11	15

By the help of this Table, and the ☾'s Southing, you may find the time of High Water in any of the Ports specified in this Table, by adding the Hours and Minutes against the Port, to the Hours and Minutes of the ☾'s Southing; the Aggregate or Sum is the Hour and Minute of the time of High Water at that Port, subtracting 12, if your number exceed it. Having so often explained the Use of this Table, I hope it needs no farther Explanation.

When the ☾ shines so bright as to cast a Shadow on the Sun-Dial, see where the Shadow falls; count how many Hours and Minutes it wants of 12, and subtract that from the time of her Southing that Night, and the remainder is the Hour of the Night. If the shadow be upon any of the Hours past 12, add it to the time of the ☾'s Southing, and that is the Hour of the Night, subtracting 12, if the number exceed 12. If the Shadow be on the Line of 12, the Hour and Minutes of the Southing is the time of the Night.

I have so often explained each Page and Column of the Almanack, that I need not do it here again.

# Astrological Observations

## For the Year 1695.

**M**isoury Genius overborn with Age,  
 Tired with Discord, batt'rd with Tyrants Rage,  
 Can scarcely guide, lest disperse to my Pen,  
 The wish'd for Comfort to my Country Men,  
 When bloody and all mauling Wars shall cease,  
 And we enjoy the hop'd for blessed Peace;  
 When we shall see Great Britains Foes ally'd;  
 Traitors rewarded that hath her betray'd;  
 When Heavens force with wrath for our gross Surquidrie,  
 Her out stretcht Arm appeased, and sinful we,  
 ( Sinking into some grand Catastrophe )  
 Our sinful Lives amend; Mercy implore,  
 Our Pardon grant, to Favour us restore,  
 When we be thus inclin'd, we need not fear,  
 But courteous Heaven to us will lend an Ear.  
 We need not fear the Stars Benevolence,  
 Will on us shed their grateful Influence.  
 Great Men will then awake with awful Care,  
 Dispel the Clouds which hide grand Treasons near,  
 Discern twixt Truth and horrid Flatteries,  
 Discard all those that love to tyrannize.  
 Indulge good Men and just, then shall we see,  
 Both you and th' Kingdom too from Danger free.  
 Mercies abus'd for Judgments ever call,  
 This turns our Freedom into slavish Thrall:  
 For God and your poor pining Countries sake,  
 Avoid the Danger and new Measures take.  
 Then shall we hope to see Heavens harmlesse Dove,  
 Bring us the Olive Branch of Peace and Love,  
 Religion flourish, and all know full well,  
 This is the Land, where God delights to dwell.  
 'Tis then and not till then the Times will mend,  
 Horrid and black Confusion have an End.

We are now arrived to the Year 1695, wherein we have the two Superiours, leaving the malignant Opposition, and drawing towards a trine Aspect, of a more benevolent and benign Nature. May the good Hand of God guide the Princes of Europe to establish a firm and lasting Peace in *Christendom*. Great Alterations, eminent and supereminent Mutations, and *Catastrophes* hath happened in mundane Affairs in most Parts of Europe, since the late triple Conjunction of the Superiours in the regal Sign *Leo*. And we have seen and felt the rough Side of their Influences, dispensed by their triple Opposition, which most Part of the habitable World have been too severely sensible of. They have too exactly made good the Character, *Astrologers* have given of this *Tri* grand and *Tri*smalign Phenomena.

I desire I may in this (as in all other Discourses of this Nature) be understood as a *Christian*, and one that believes that God is not confined to the Influences of the Heavens, or any secondary Causes: Though it is apparent that he makes use of their Influences, instrumentally in the Government of the World. Yet he frequently acts beyond the Extent of their Influences, and sometimes contrary to them, and all to propagate his holy Designs in the World. And it were well worth a Christian's Observation, what wonderful Providences, Series of Providences, Turnings and Overturnings, God hath been pleased to awaken us with in this Age: And such as hath no dark Face, nor uncertain Sound to the whole World, and especially to the Church and State of *Brittain*. We have enjoyed extraordinary Mercies, both of the right and left Hand; how we have used or rather abused them, is too too notorious.

God hath given us extraordinary Measures of divine Patience and Long-suffering: And if Repentance doth not speedily answer, and meet the Lord in the Way, we must expect to find, that the Stroke will be the more terrible; there will come a Year of Recompence, a Day of spotless Vengeance, when his Spirit will no more strive with Flesh, but will clear his Justice, and see the Authority of his Laws, and sentences of his Word, ratified in the Execution.

Execution thereof. When no intercessor shall be heard, nor none to stand the in Gap, none to flave off the threatened Stroke or Judgment: Nor no more able so to do, than to turn the Course of the Sun, recall the Days and Years past, or make void the Ordinances of Heaven. For certain it is that the most notable Mercies that God hath bequeathed to Churches, Nations or Persons, have been an Entry to the greatest Judgments, when not answered as the Lord requires. Was it not an extraordinary Appearance of God's Hand, and an immediate Course of Miracles, that brought *Israel* out of *Egypt*? And what a Night of dismal Providence succeeded in the Wilde-ness? They not answering the Mercies of God by a faithful and obedient walking with him. God speaks to us now as he did to *Israel* of old, *Malahy* 2. v. 2. *If ye will not hear, and if ye will not lay it to Heart, to give Glory unto my Name, saith the Lord of Hosts, I will even send a Curse upon you, and I will curse your Blessings; yea I have cursed them already, because ye do not lay it to Heart.*

Pardon this Digression. I will now come to consider the four Quarters of the Year. and first,

*Of the Winter Quarter.*

THE Winter Quarter begins this Year 1695, on Tuesday the 11th. of December, at 51. Minutes past six in the Morning; at which time the Sun hath made his furthest Progress to the South, and consequently farthest from us; and we receive the least of his Warmth, Light and Lustre. At which time the Heavens appear in this Form and Figure.

The	Mid-heaven	14 Degrees	8 Minutes	♊
	Ascendant	13 Degrees	6 Minutes	♊

All the Planets are under the Earth except *Jupiter*, who is in the descending Part of Heaven, in the eighth House, and hath lately past the Trine of the Sun, which may probably incline the Air to Serenity at sometimes,

and to a frosty and cold Disposition; that may introduce a forward Winter, and very sharp. And so much the more likely, seeing a Conjunction of Saturn and Mars follow in *v Capricorn*, an earthly and cold Winterly Sign. It is a tropical Sign and therefore the more critical and notable. Oftentimes great Frosts attend the Aspect, but whatsoever it be, expect Extremity. Sometimes fiery Mercors have attended this Aspect, sometimes *Halos*, *Trides*, *Pavilli*, sometimes a dark and gloomy Sun, and sometimes Earthquakes, as you may see in Dr. Goad's Collection of foreign Diarys even in the Winter Quarter. Saturn and Mercury conjoyns and corresponds to cold, frosty and winterly Weather, cold Winds and Clouds threatening Rain or Snow. The Sun comes to a Conjunction with Mercury. The next Day after he enters the Tropick, which is of the same Signification as to a frigid Temper, and may also afford us some Snow or cold Rain: The like doth the Conjunction of Sun and Saturn, and Saturn and Venus, which many and various Configurations of the Heavens in the Month of December may very probably be attended with as various and oft changing Weather, but mostly cold, colder than many times happen so early in the Year.

*Mali* saith, *quando Mars junctus fuerit cum Saturno, frust quilibet alteri Fraudis & Deceptiones; & erunt inter Homines, Percussiones & Vulnera; &c.* When Mars shall be in Conjunction with Saturn, Men will work treacherously and deceitfully one with another, there will happen Blows and Wounds among Men. Were it a Time fit for Action, we might justly expect a Battel or some considerable Encounter; perhaps some City, Town, or Castle may be surprized or treacherously delivered. He further saith that there will happen Loss and Damage to some Potentate, King, or great Man of the Country subject to the Division of the Sign wherein the Conjunction happens: Perhaps there may be some Tumult or Disturbance in the grand Signior's Territories, more than ordinary, or the Revolt of some of his Bassa's; for under the Sign of Capricorn are many of the Countries under the Dominion of the Ottoman Emperor. Many Places are assigned to be under the Govern-  
ment

men of Capricorn; which for Brevity sake I will omit, least that I make my Discourse on this Quarter too prolix. Those People that live under the opposite Sign, viz. Cancer, may probably be sensible of the male Effects of that Conjunction, among the rest let Scotland and the Netherlands beware. And may the University of Oxford be free from Disturbance this next Year. This Conjunction seems to threaten her Peace and Well-being, and so doth the Conjunction of the Sun and Mars in January.

Of which Conjunction Holy saith, *Sed junctus fuerit cum Marte, significat Lites & interfectiones multas in Terra orientis.* It signifieth many Strifes, Contentions, and Slaughters in the Land of the East. Bonatus saith, *Mars in Capricorno, significat Bellum, & Depredationes, atque Tribulationes, Mortem in Hominibus juvenibus; similiter & Tremores venturos in Partibus orientis, &c.* At si fuerit *Latitudo ejus meridiana significat Calorem Aeris in suis Temperibus, & ejus Obscuritatem.* Mars in the Sign Capricorn, signifieth War, Depredations, Tribulations, and the Death of young Men; likewise it signifieth Earthquakes in the Eastern Countries, &c. And if he hath South Latitude, it signifieth a warm Air at some times, and a dark and obscure Season. What Disposition this Aspect hath towards the Alteration and Change of the Weather, is worth the Enquiry of the most ingenious, and let him or them peruse the Observation of the most diligent and strict Searcher into this Kind of Learning, viz. Mr. John Goad and his Diary upon this Aspect. Mars is famed for a hot and dry Planet, and indeed his Colour bespeaks him so, he looks red and fiery, and therefore called by the ancients *Pyrois*. *Stella Martis incandit,* saith Cicero. Pliny gives him this Character, *Ignis ardentissque Natura.* *Stella Martis rapax,* saith another. Thus hath the Ancients transmitted the Fame of his notable Excesses: And overlook'd the more temperate and remiss Intervals. Though the Arabians gives this Influence, through all the Signs almost, *calens Color, Securus Aeris*: Yet in our Climate he doth allow us some Moisture, some Wet, and Thunder at some Times, which seldom comes with

# Astrological Observations, 1695.

out. Wet. It is true, he is dry, and naturally resists Moisture, and contributes much to Serenity, and when he doth so at this Season of the Year, he is oftentimes the Cause of great and sharp Frosts: And probably he may influence such a kind of Weather this January. Yet when Venus affords with second Influence (as she doth before the Month is ended) doth oftentimes procure some thawing or washing Weather, or at least a misty and a foggy Air, with Remission of Cold; but I will say no more of this Quarter.

## Of the Spring Quarter.

THIS Quarter begins this Year on Saturday the 9th. of March, at 20. Hours and 30. Minutes after Noon, vulgarly on Sunday the 10th. Day at 30. Minutes past 8. in the Morning, the Figure follows.

This is the Season when the Sun, that glorious Lamp of Heaven toucheth the first Scruple of the *Equinoctial* Sign *Taurus*, and maketh the Days and Nights of equal Length to all the inhabitable Parts of the World.

All the Planets are above the Earth except *Jupiter*, who is in *Imo Caeli* retrograde, and in *Sexile* to the Ascendant, and in *Trine* to *Mercury* and *Venus*, who accompany the Sun, in the 11th House, casting their benevolent Rays to the Ascendant also. Were there such a Certainty in *Astronomical Tables*, that a Man might safely build an *Astrological Structure* thereupon; this Figure would give us some Hopes of better Times, Hopes of a *Jubilee*, and a more propitious Year than heretofore, and better Times to the Commonalty and Meaner Sort of People. But I shall (as ever I have done) wave that as not practicable, by reason of the great Difference there is among *Astronomers* in finding the true and exact Time of the *Vernal Equinox*. And rather consider the Configurations of the Planets *inter se*. There is at this Time no eminent Aspect or Configuration of the Superiors. The most considerable is the *Quartile* of *Saturn* and *Mars* about the Middle of *April*, of which I shall take notice of in its Place. We begin to hope now that the dire Effects of the late triple Conjunction, and of their triple Opposition, which hath so rigorously and most eminently been manifest to all *Europe*, and indeed to most Parts of the habitable World; begin to decline and wear out, having now moved above 30. Degrees distant, and suddenly drawing near to a *trine* Aspect, of more moderate and kinder Nature, and God grant that we may be as sensible thereof as we have been of the rough and malevolent Effects of their late Oppositions.

The most eminent Aspects near this Ingress, is the *Quartile* Aspect of the Sun and *Saturn*: *Haly* saith, *Significat quod reges in suis rebus, se abscondet, & consultabunt, seu facient res, & secreta sua in magno secreto. Il significat that Kings shall conceal their Designs, consult of and manage their Affairs with great Secrecy and Policy.* We may expect

## Astrological Observations, 1983.

pecta. Time of close Conspications, and such as are managed with great Secrecie. It signifieth Fears and Jealousies of the People, and murmuring against the Actions of their Superiours, which may attract the Frowns of Authority towards them, and some may severely suffer for it. But Jupiter's friendly Trine will alter the Scene and moderate Affairs much, and some prudent Court-man advanced to Dignity. There is a Quartile of Saturn and Mars about the Middle of April, which is an Aspect of an inauspicious Nature, *Significat quod erunt multa Furta, Latrones & Predones, multi & manifesti*. It signifieth many Thieves and Robberies very publick and notorious. Plunderings and many Outrages where Armies and Soldiers are; and some Skirmishes or Rencounters. *Et accident populo Anxietates & mala ex Partu Regum: & ipsi erunt non eis obedientes.* That Part of the Zodiack wherein Mars is located, *communitur turbulenti: Saturnum autem in capricorno facere gravissimas Pluvias precipue in Italiâ.* As Horace noteth.

Tyrannus  
Hispanie Capricornus Unde.

And probably the Aspect may raise some turbulent Weather with great and unpleasant Showers, though the Aspect it self is not of a very moist Nature.

### Of the Summer Quarter.

THIS Quarter commenceth with the Sun's Entrance into the Tropick of Cancer, and makes our longest Day and shortest Night to all that inhabit on this side the Equator.

It happeneth this Year on Monday the 10th. of June, 21. Hours and 43. Minutes; or more vulgarly on Tuesday the 11th. of June, at 43. Minutes past 9. In the Forenoon, at which Time the Face of Heaven presents its self thus, 212

The { Mid-heaven 28 Degrees 1 Minute of 8  
Ascendant 5 Degrees 57 Minutes of 12 }

All the Planets are above the Earth except Saturn and the Moon. The first Aspect that offers after the *Substantial Ingress* is the Opposition of Saturn and Mercury, producing a Company of squirting Pamphlets, and Libels to amuse and abuse the Heads of the glady Multitude, signifying little to the Disquiet of the Government. The next is the Opposition of the Sun and Saturn, which gives the Government some Trouble, from Men nearly concerned therewith, Men of the long Robe, either of the Law, Civilians, or Ecclesiasticks, &c. There is not many superiour Aspects this Quarter, but what happens in August. There is an Opposition of Saturn and Mars, from 8. Degrees of Capricorn and Cancer; Cardinal, Solar, and Tropical Signs, therefore more famous and eminent in their Effects; *Significat quod homines in se invicem discordabunt, & prosequentur se mutuo odio, & cessabunt se familiariter invisere, & detraber quilibet alteri.* It signifies that Men shall be at Variance among themselves, and shall prosecute one another with mutual Hatred and Malice, and shall cease from mutual and neighbourly Visits, and shall endeavour to vilifie one another, and detract from each other what they may. I pray God preserve the Peace of Scotland, that their private Divisions, Hatred and Discords, which seem to be more than ordinary, may not too much affect the publick Peace of that ancient Kingdom. And let Holland beware, and advise their Counsels, the Emergency of their Affairs require it. And let the malign Influence of the Heavens spend themselves on the Ottoman Empire and his present Allies. Where Armies or Fleets are near, let them try the Power of their Swords, who have of late made a Trade too much a Trade of the War.

New enter the long wish'd for and long look'd for Truce and friendly Aspect of the Superiours. Oh! may it afford Balsoms to heal the Wounds, and deep Scars of the dire Influence, the Opposition hath impress'd on the habitable World. Many good and faithful Endeavours are

## Astrological Observations, 1695.

are used, and many Transactions are on foot to procure a firm and lasting Peace. But *Jupiter* is weak in his Decrement and under the Sun Beames, and *Saturn* is strong in his own House; so that we have cause to fear that many Difficulties do intervene, so that the Hopes of a Period of *Europe's* Combustions and Molestations, seems at sometimes to be frustrate; at all times matters of that Nature go on but slowly, and meets with very great Difficulties in their Performance; the Jesuite and Jesuited Party signified by *Saturn* having too great a Rule and Dominion in *Europe*, especially in the Courts of Princes. Those superiour Aspects may probably give some Disturbance in *August* to the Harvestman, for some Time by their turbulent Influence.

### Of the Autumnal or Harvest Quarter.

**T**His Quarter begins this Year on *Thursday* the 12th. of *September*, at 19 Minutes past 11 at Night. This is the Autumnal or second Equinox, the Earth is now at right Angles with the Sun, and receiveth an equal Portion of Light and Darkness, at which Time the Heavens presents themselves as followeth.

The Midheaven 18. Degrees 51 Minutes of  $\delta$ .

The Ascendant 19. Degrees 1 Minute of  $\phi$ .

The Moon at that time culminates or is possess'd of the Midheaven, *Saturn* is become direct and is descending the Western Horizon, all the rest are under the Earth. The Planets are mildly disposed, and the Superiours have no considerable Configuration one with the other, I mean no particular Aspect, but the two Superiours are in a platick Trine, *Significat quod illi qui leges predicant, & presunt, & qui deputati sunt ad secreta regum, ben rati sunt. It signifies* that Gentlemen of the long Robe, both Lawyers and Clergymen, and such as are entrusted with the King's Secrets, viz. Privy counsellors shall advance themselves, and seek their own Honour and Glory; It is like enough, and one Experience will testify the Truth of the *Apophism*, if he had said their own Profit too. The Sun is Quartile to *Saturn* and *Mercury* soon after the Ingress, it signifieth a murmuring and discontent among the vulgar or commonalty against their Superiours, and much whispering against their Actions and Counsels, which gives Occasion for much

libelling and scurrilous Pamphlets to be sung abroad, to the Disquiet of the Government, and raising more and more Discontents among the People. I shall no more mention of the Aspects of this Quarter, being many and of a various Nature, do foretel Variety and oft changing Weather, yet that which for the most part befits the Season; tho' at some times it seems to extend to extremity. If Extremity of wet Weather or turbulent happen about Gunpowder Treason in November, from the Quartile of Mars and Venus, wonder not, for they frequently do so. And a Week after the Sun and Mars are in Quartile, it oftentimes cause warm or remission of cold, yet they give sometimes great and washing Showers, tho' Mars is famed for a hot and dry Planet. Observe the Event. *Deus Astra regit.*

*Of Eclipses happening this Year 1695.*

There will be four Eclipses of the Luminaries this Year, two of the ☉ and as many of the ☾. The first will be an Eclipse of the ☾ on the 18 day of May, about a quarter past 10 in the Morning, not visible unto us. The second of the ☉ on June 1. between 5 & 6, not visible to us by reason that the visible Latitude exceeds the Sum of the Semidiameters of the ☉ & ☾. Of the third the Calculation follows. D. H. M.

Middle time of the true	8 Nov. 10	7	5	12.
Place of the Sun		28	43	55.
Eccentric Place of the ☾		28	43	55.
Anomaly of Latitude		59	13	
True Latitude N. D.		41	46.	
Reduction add		1	48.	
Hourly Motion of the ☾ from the ☉		29	55.	
Reduction to be subtracted		3	26.	
Reduced time of the true		59	46.	
Equation of time added Ticho		8	51.	
Time of the true		10	7	8 43.
Semidiameter of the Moon			15	00.
Semidiameter of the Earths Shadow			39	38.
Sum of the Semidiameters			54	38.
Latitude of the Moon subtract			41	46.
Parts deficient			12	52.
Digits eclipsed			8	48.
Angles of Incidence			35	13.
Time of Incidence			1	10 38.
Total Duration			2	21 46. The

# Astrological Observations, 1695.

 Middle or greatest Obscuration } at 7 6 56  
 End } 8 19 36

The Latitude at the { Beginning } N. D. 45 2  
 End } 38 28

The last will be an Ecliofe of the Sun, not to be seen of us, because the Luminaries will be under our Horizon. The Synod happens on the 26th. of November, between 7 and 8 in the Morning.

*Qui legis ista, tuam reprehendo, si mea laudas  
 Omnia, Stultitiam, si nihil, Invidiam.*

*Farewel my Book and thy Design pursue,  
 Be not concerned, what curious Eye ther view.  
 If one like all, and seem to spread thy Fame,  
 Be not exalted nor tis Folly blame.*

*Perhaps another comes, and all decrites,  
 Conclude him envious, be he nere so wise.*

*If thou prove useful to thy Country Friend,  
 Tell them thy Errand's done thou hast thy End.*

Amerfham Bucks,

Aug. 13. 1694.

FINIS.

## ADVERTISEMENTS.

*John Russell*, his Spirit of Scurvy-grass, both Plain and Purging, is the most strong, piercing and powerful Elixir of Scurvy-grass that is now sold: Those that buy it may ease, and if it is not so, may return it without loss. Being fit for the Closet of any Physician, and admirable in the Scurvy, Dropsie, Gout, and most other Diseases. And his Lozenges for Coughs, Colds and Consumptions, with his Powder that kills all sorts of Worms. Sold at his House at the Two Alew Posts again't Cross-Ins in Holborn, and in most great Market-Towns. Each sold for One Shilling.

*Glaser's Works* in a large Folio (containing Variety of Secrets in Physick and Chymistry, sundry Ways of trying Metallick Oars, working in Mines, separating Metals, making Salt-petre, enriching barren Land, and improving the Fruits of the Earth) translated out of Latin and High-dutch, by *Christopher Pach*.

*Mineralogia*, or an account of a Mineral Salt, its Use in Physick and Chirurgery, safe, pleasant and effectual in its Operation; with an Account of Mineral Sulphurs, their Nature in curing Chronichal Diseases. Both sold by *Christopher Pach* next Door to Gun-Alley, in Little-Mort-Fields, and by *S. Manship* at the Ship in Cornhill, price 6d. of the last
